

Salt Separation Services

ENVIRONMENTAL POLICY

Salt Separation Services recognises that its day to day operations can impact both directly and indirectly on the environment.

The Company will work to integrate environmental considerations into our business decisions and adopt greener alternatives wherever possible throughout our operations.

The Company will fulfil this commitment by implementing an Environmental Management System in line with BS EN ISO 14001.

To meet the requirements of the standard the Company will provide financial resource and aims to:

- Observe relevant environmental legislation, statutes, codes of practice and Industry Standards.
- Educate, train and motivate its employees to work in an environmentally responsible manner.
- Establish objectives, targets and effective monitoring of environmental performance.
- Periodically conduct environmental audits to determine the level of compliance with the environmental management system and use the information to improve our performance.
- Reduce waste by changing working methods and practices to become more efficient and through re-using and re-cycling.
- Involve customers, partners, clients, suppliers and subcontractors in the implementation of our objectives.
- Ensure, where practicable, that our buildings are managed to achieve a good standard of environmental performance.

The company has appointed an Environmental Management Representative to develop the necessary environmental procedures, establish and test processes to deal with emergency situations, ensure appropriate training is provided to staff and implement a periodic management review of the Environmental Management System.
